Forecast for Thursday 23 Jun 2022

Weather: Clear skies during the early hours with some shallow mist and fog possibly forming in the valley bottoms. Mist soon clearing after dawn with unbroken strong sunshine during the morning and quickly becoming very warm. Turning slightly cloudier during the afternoon but remaining bright with sunny spells. A low chance of heavy showers or thunderstorms developing later in the afternoon and through the evening.

Chance of cloud-free hill tops above 800m: 100%

Low Cloud and visibility: Shallow mist and fog a first may briefly lift to give ragged patches of cloud around 400m, but this clearing by 0900 to leave all hills and mountains cloud free. Generally good visibility however locally poor in early mist and distant hills will appear rather hazy.

Freezing Level*	2700m	2600m	2600m	2500m	2600m	2800m	2800m	2800m	2700m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A warm day is expected, even on the summits, and it will feel hot out of the breeze and on south facing slopes. UV levels will be very high and therefore good sun protection is recommended.

Forecast for Friday 24 Jun 2022

Weather: Becoming mostly cloudy during the early hours but any showers clearing away. Largely dry during the morning but perhaps some light drizzle in the west. Brightening up with a chance of showers during the afternoon. Longer periods of rain are possible by the evening, locally on the heavy side.

Maximum wind: Southwest 20mph gusting 30 mph.

Chance of cloud-free hill tops above 800m: 30-40% rising to 70%.

Low Cloud and visibility: Periods of cloud developing above 400m or so during the early hours, especially over western hills. This lifting and breaking to give periods of cloud above 600m by late-morning. Patches of cloud above 700-800m during the afternoon and evening. Generally very good visibilities but very poor in cloud and briefly poor at all levels during any rain/showers.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 20 Celsius.
At 800m: Plus 9 Celsius rising to plus 13 Celsius.
Freezing level: Well above the summits.
